

# STEYR LG 110 BENCH REST

The feeling of a winner!

The designer of the LG 110 BENCH REST at Steyr are not only technically capable, but are life-long shooters as well and it shows with the request of shooters and their own personal experience. For these reasons, they have the best knowledge of the wishes and desires of the shooters on the range. This knowledge is carried through on every new product, as ideas are developed, tested and confirmed on the shooting range.

As the best system of **absorbing**, **STEYR's stabilizer** dominates others. Even competitors like Anschütz have based their new rifles on this solid performing and maintenance-free system, proven the best in an independent laboratory comparison.

## Maximum individuality due to quick and easy adjustment systems

- Alu-stock with high tech butt plate and «trimmer»
- Trigger-innovation: single stage trigger accomplished by only turning one screw
- Maximum adjustments of the grip within the allowance of the rules: infinitely adjustable in both horizontal and vertical directions
- Longer forend stock adjustable in length and angle
- Cheek piece adjustable in all directions
- 22-mm-front sight tunnel for larger view of the target
- Rear and front sight with special sighting line extension for bench rest
- STEYR stabilizer completely eliminates recoil:  
**no maintenance necessary!**
- Unique and efficient power system:  
Approximately 450 shots at 7,5 Joules!  
(5,5 ft/lbs)
- Innovative safety design: Cannot be fired unless action is completely closed
- Dry fire and training shots simply by opening the cocking lever: no tools necessary! Easy!
- Ultra short lock time
- Comes complete with weights for the barrel and stock as well as front sight; rear sight with special sighting line extension
- Special Alu butt-plate for bench rest shooters
